

Features and Benefits Embelton Australian Longboards

Australian timber colours

Australian Longboards come in six popular Australian timber colours – Spotted Gum, Coastal Blackbutt, Lemon Scented Gum, Stringybark, Ironbark and Blue Gum – providing the look of genuine Australian hardwood floors, but with the hard wearing qualities of laminate.

Robust

Tougher than traditional engineered timber floors, Australian Longboards come with a 25-year residential structural guarantee. Resistant to stains, moisture, scratches, indentation and cigarette burns, it is ideal for family flooring or commercial installations

Environmentally sound choice

Australian Longboards create the appearance of a genuine timber floor, but use minimal timber resources. Made of high density fibreboard (HDF), manufacturing places few demands on the natural environment, making it the ultimate sustainable floor.

Affordable

Australian Longboards are an attractive high performance floor, at an affordable price.

Versatile

Australian Longboards can be laid over almost any type of subfloor, including existing wooden subfloors and even concrete slabs.

Easy to install

The patented Unilin click system makes installation straightforward and uncomplicated. Even suitable for DIY. No glue is required, just click and go – you can begin walking on the floor as soon as it is laid. And if a board gets damaged, it can easily be replaced.

Hygienic

Unlike carpet, laminate floors won't attract any dust mites or bugs, and due to their easy-to-clean nature, make the perfect hygienic floor – especially important if you have children or pets.

Perfect for commercial installations

Australian Longboards are durable and easy to maintain. Unlike timber, they will not cup, contract or expand – creating one less item for concern in commercial environments.

Technical specifications:

- Colours: Spotted Gum, Ironbark Coastal Blackbutt, Stringybark, Blue Gum, Lemon Scented Gum
- Unilin click system
- Board dimensions:
1800 x 168 x 12 mm
- 8 boards per pack to cover
2.419 sq.m
